

## MOTTURA

More and more design for the roller blinds for residential use and not only. **Eclisse**, the line of roller blinds of design is enriched by a "slim" range which does not mean less valuable, but simply a line of blinds with spring actuation, chain stitch and double drive Plus destined for a larger target. The aesthetically pleasing product is very well maintained and is clearly intended for a medium size blind also in environments not particularly spacious given the smaller "import-

ance" of the product. Two versions are provided for and precisely: Eclisse S2. Characterized by the roller supports design which give importance to the ends of the tent Eclisse S3 in which the roller and decorated with a pelmet to full width. Eclisse, in his 2012 upgrade can be installed both on the wall and ceiling interesting and original in case of installation to ceiling a solution with a double valence, front and rear for a design even more refined.

## PARÀ

As per tradition, Parà will also be featured at the next edition of Proposte at Villa Erba in Cernobbio. The new products at this edition will take our visitors on a long sensory journey which, following a common thread, will traverse 5 distinct and really innovative themes. Each of these themes will be developed through a series of unique drawings. The drawings will highlight the production capacity of Parà to the fullest, both in terms of construction of the fabric and printing ability. The combination of foundations of great quality and varied textures and innovative prints will lead to a truly exceptional experience. A new range of fabrics that embrace both natural fibres and products for the outdoor world in which Parà is the world leader with the Tempotest brand. Parà awaits you at stand 33 in Ala Lario
